“ Uncle Charles was very inspirational when I created a math concept. He provided me information that allowed me to protect this simple and effective concept.

*His concept of creating toys was .... The research he found was shared with me during countless conversations. Uncle Charles provided me a book to read to encourage me with my educational concept.*

*I will never forget when I spent a week with him when he worked for a corporate law firm. I saw how his coworkers appreciated him. When at home, his studio was his time to think and create music.*

*His love for his family was felt. He would call and mentioned his parents (deceased). Despite the number of times he called, I loved how he pronounced my name. No one will ever be able to say it like him.*

*Recently, I dreamed about him. In the dream, he was so happy. During our conversation, he said Joyce and them are going to be alright. I shared with my Moma, his sister, (Jean), that brought peace to me.*

*I'm going to miss him calling and coming to NC. He's gone in the physical realm, but he will never be forgotten. Therefore, let's continue to pray for my uncle's wife, children, and Barnes family.*

*Blessings,  
Uncle Charles's niece, Lynn  
( He called me Motormouth. I will miss that 😞).*
